SUMMARY

I'm a Junior Software Engineer with experience developing Android and web applications using Kotlin, Java, Jetpack Compose, JavaScript, and React. Passionate about mobile application development and continuously expanding my Android development skills through personal projects.

HIGHLIGHTS

- **BS in Computer Software Engineering**, Western Governors University, July 2025
- **Full-Stack Development Graduate, Per Scholas w/ TEKSystems**, October 2022
- **Certifications:** AWS Cloud Practitioner, UX/UI Design, ITIL Foundation
- **Tools:** Android Studio, VS Code, IntelliJ, MariaDB/HeidiSQL, Figma, Jira, XCode
- **Soft Skills:** Quick Adaptability, Critical observation, Problem-Solving, Self-Management

WORK EXPERIENCE

Junior Software Engineer / IT Helpdesk Support

July 2025 — Present

- Led the end-to-end SDLC of a few projects, from stakeholder requirements gathering and solution planning to development, product demonstrations, and ongoing maintenance
- Contribute to the development and maintenance of a React-based website hosted on AWS Amplify
- Perform QA testing and debugging to identify defects and validate functionality
- Develop PowerShell automation scripts to streamline internal processes and reduce manual tasks for helpdesk team

Recent Projects:

- **Event Management System**
Designed and developed an Android mobile application using Android Studio, Java, Jetpack Compose, RoomDB, and the MVVM architecture. Built features for event creation, user communication, and reminder management to help users organize and participate in daily activities through a single, intuitive platform. Implemented modern Android development practices and published the application on [itch.io](https://cgom171.itch.io/event-tracker).
<https://cgom171.itch.io/event-tracker>
- **Ministry Web**
I volunteered my time to develop a website for my church using React and JavaScript, using tools such as Visual Studio, GitHub, and Render. The website is still in development. A database will be integrated, and a feature that will allow administrators to make changes to the site will be added as well.
